

BUSINESS INTELLIGENCE

Today's businesses are under increasing pressure to lower costs, deploy resources more intelligently, and maximize the return on every budgeted dollar. In this environment, the businesses that thrive are those who can agree on priorities, share information, and act quickly and decisively. They capitalize on the value in their existing enterprise systems and applications by making the information they contain available on a real-time basis.

That's just what TAKE Solutions makes possible. Our experts work with you to implement a business intelligence solution that helps you make the vital information locked in various applications more easily accessible. Employees throughout your organization can track real-time performance on your most critical metrics, providing a solid foundation for higher accountability and more strategic decision making.

BUSINESS INTELLIGENCE THAT'S SMART BUSINESS

A Tailored Approach

No two businesses are the same. The most effective BI solutions reflect your unique challenges and adapt to your distinct processes. That's why TAKE tailors each implementation to the realities of each business. Our approach allows businesses who may not have sufficient time or in-house expertise to customize a solution to meet their specific needs.

A Streamlined Implementation

TAKE's PowerStart implementation is designed to get your BI solution up and running in as quickly as one week by targeting your most vital business priorities. You can then expand your implementation on a when needed, as needed basis.

The Right BI Technology

The experts at TAKE will work with you to choose the BI technology that makes sense for your business and makes the most of your existing IT and information resources. We've helped our clients successfully and cost-effectively implement the industry's leading BI technologies.

The Value of Vertical Expertise

At TAKE, we're not just experts in BI technology— we're also experts in the best practices that lead to success in your industry. That means we can implement a business intelligence solution that addresses your industry-specific concerns and performance goals.

THE TAKE ADVANTAGE

EXPERTISE, SUPPORT, VALUE

Cost efficient

Our services fit the way you work, with on-site, off-site, offshore, and outsourcing options.

Quicker time to value

TAKE's domain expertise in Supply Chain, Life Sciences, Retail, Finance, and Telecom gets you up and running sooner.

Greater flexibility

TAKE designs business intelligence solutions to accommodate the full range of user needs, from technical novices to power users.

A trusted partner

We have more than ten years of experience with leading BI technologies, including **SAP BusinessObjects and Microsoft.**

More effective collaboration

TAKE provides you with a single version of the truth on your business performance. It helps the different areas of your business work together by showing how their efforts align with key business metrics.

Streamlined compliance

You can monitor changes in business activity to ensure that you stay in compliance with regulatory and policy requirements.

Enhanced control

With TAKE, you can take a more proactive approach to the challenges you face and anticipate problems rather than react to them.

Higher efficiency and lower costs

Because you have real-time visibility into your most critical performance metrics, you can deploy resources and budget with great efficiency and waste less money on ineffective processes and initiatives.

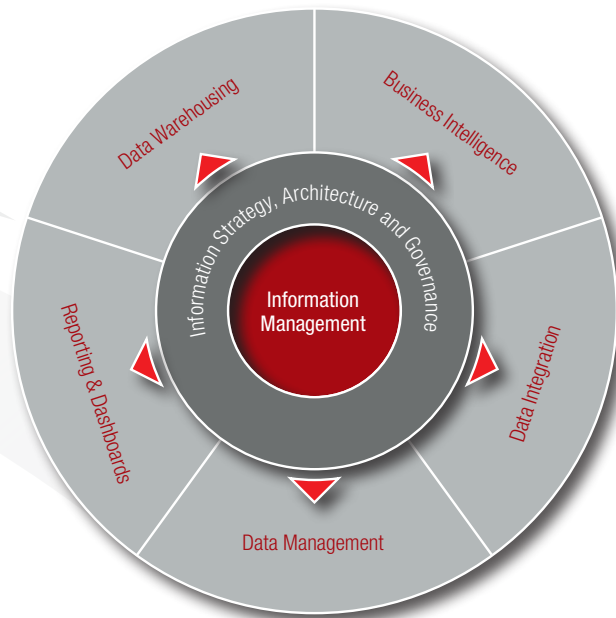

Local presence, global reach

TAKE Solutions with more than 800 employees worldwide, is a global provider of business technology solutions with our US headquarters in Princeton, NJ and our offshore development Centers in India and Malaysia.
