Asst. Company Secretary

*For Immediate Release*

**New Order-to-Cash Features in OneSCM from TAKE Supply Chain Extend Value for B2B and B2C Mid-Market Companies**

*Integration and automation of key sales order, fulfillment and revenue activities allows for true end-to-end management of the supply chain*

**Chennai, India, September 22, 2015:** TAKE Solutions, a leader in the Supply Chain Management (SCM), announced the addition of sales-focused transactions to OneSCM®, a leading SaaS-based supply chain collaboration software solution focused on helping mid-market companies increase operating margin and grow market share through better performance of extended supply chain operations.

The new transactions, which can also be referred to as “Order-to-Cash,” feature automated sales order creation and management, inventory visibility, and status for key activities such as fulfillment, delivery and receipt of payment. The transactions were created to complement OneSCM’s procurement-focused transactions – those associated with manufacturing finished goods for customer orders and to be integrated with sales and operations planning systems. Altogether, OneSCM is now able to facilitate even greater end-to-end management and flexibility of a company’s supply chain operations.

“A key advantage of these new transactions for OneSCM customers is the increased accuracy, visibility and expedited management capabilities they bring to sales activities. The application of these new features isn’t limited to Business-to-Business (B2B) transactions. OneSCM is also configured to seamlessly integrate with systems designed for Business-to-Consumer (B2C) transactions as well”, said **Donna Fritz, VP of Marketing & Product Management, TAKE Supply Chain.**

Once an order is received and acknowledged in OneSCM, a sales order can be auto-created and released in our customer’s back office system and sent back to OneSCM for ongoing management and tracking of all activities associated with the sales order, including inventory visibility and availability to promise (ATP), order fulfillment status, proof of delivery and receipt of payment.

Another key advantage for OneSCM customers is the seamless system integration that is possible between all trading partners and customers. Buyers and sellers are all connected through OneSCM, regardless of any differences in back office systems or means of access. OneSCM’s powerful messaging and transform engine connects data streams from a multitude of sources, allowing companies to leverage a single management center for all buying, selling, and planning activities. This eliminates the need for expensive back office system upgrades or replacements.

A demonstration of the OneSCM can be requested through the company’s website at [takesupplychain.com](http://takesupplychain.com)

**About TAKE Solutions**

TAKE Solutions is a leading domain focused technology company offering services/solutions to the global market. The company provides cost-effective and comprehensive solutions for enterprises across diverse sectors including pharmaceuticals, high technology, consumer packaged goods, oil/gas, and automotive.
