Company Secretary

For Immediate Release

TAKE Supply Chain recognized consistently as a Food Logistics Top 100 Software and Technology Provider for 2015

OneSCM® from TAKE Supply Chain is increasingly recognized in the Food Logistics market as a driver of revenue growth and competitive advantage, as well as providing operational cost reduction.

Austin, TX – January 21, 2016 – TAKE Supply Chain, a division of TAKE Solutions, has been named a “Top 100 Software and Technology Provider” by Food Logistics (FL) Magazine. TAKE Supply Chain, a consistent FL 100 provider, offers leading supply chain collaboration and data collection solutions that enable organizations to take control of their supply chains for more rapid and more confident decision-making internally and across their trading partner networks.

For more than a decade, the editors of *Food Logistics* have profiled software and technology providers that hold influential roles in the global food and beverage supply chain. Their products benefit the industry in multiple ways, from reducing food waste and extending shelf life, to facilitating safe and sanitary transportation of product while assuring regulatory compliance.

“We are delighted to once again receive this recognition from Food Logistics magazine,” said Brad Huff, EVP and General Manager of TAKE Supply Chain. “Our food and beverage customers face a growing number of challenges. We are honored to have long-standing partnerships with some of the world’s leading brands and to provide solutions that drive their ongoing supply chain improvements. Delivering innovation, focus and an unparalleled commitment to the success of our customers remains our top priority.”

“Developments in the software and technology sector are generating new opportunities for growers, food manufacturers, grocery retailers and the many logistics providers that support them,” notes Lara L. Sowinski, editor-in-chief at *Food Logistics*. “Moreover, cloud-based solutions and mobile connectivity are helping create tools that are more flexible, affordable and responsive, making software and technology even more valuable to those in the global food supply chain.”

Over 150 companies applied for this year’s *FL100+*, more than any prior year. The *FL100+* is designed to serve as a resource guide for the readers of *Food Logistics*. Companies who earned a spot on the *FL100+* list are featured in the November/December 2015 issue of *Food Logistics*, as well as online at www.foodlogistics.com.
